The increase in trade receivables and inventory created a need for financing, increasing the financial liabilities by 46% to TL 228 million (2018: TL 156 million). A positive aspect is that 73% (TL 166 million) of financial liabilities are long-term.

In addition to all these factors, the short and long term outlook of the Company has been determined as **"Stable"** by taking into consideration the issues such as Tat Gıda's shareholding structure and industry experience. However, as the World Health Organization declared a pandemic on March 12, 2020 in relation to the coronavirus (Covid-19) epidemic which initiated in China, the recent extraordinary developments in the global trade environment and money markets make the potential economic consequences of the pandemic extremely uncertain. There is an increase in demand of food in our country due to the measures taken to reduce the effects of the corona virus epidemic. When the 2020 Q1 financials of the Company are analyzed, it is seen that sales increased by 44% compared to the same period of the previous year and reached TL 377 million (2019 Q1: TL 262 million). In the same period, inventory decreased by 22% compared to the end of 2019 and fell to TL 263 million. The developments are closely monitored by us and if the tangible risks arise, changes can be made to the Company's rating and outlook.

Corporate Governance

The Company has provided substantial compliance with the Capital Markets Board's (CMB) Corporate Governance Principles and has implemented all of the necessary policies and measures. Management and internal control mechanisms have been created effectively and are in operation. All of the corporate governance risks are identified and managed actively. The rights of shareholders and stakeholders are respected in a fair manner and public disclosure and transparency is at superior levels. Structure and operation of the board of directors is in the category of best practice. There is almost no frailty in these areas.

Methodology

SAHA's credit rating methodology is composed of quantitative and qualitative sections contributing to the final grade with specific weights. The quantitative analysis components consist of SAHA Score which measures the Company's distance from the point of default, its performance compared to industry peers, analysis of the financial risks, and the assessment of cash flow projections. Default probability analysis measures a statistical distance to the point of default making use of industry specific significant financial ratios based on industry peer sample companies' past financial performance and default statistics. Comparative performance analysis determines the relative position of the company as compared with industry peers' financial performances and industry averages. The financial risk analysis of our methodology covers the evaluation of the Company's financial ratios on the basis of objective criteria. Liquidity, leverage, asset quality, profitability, volatility and concentration are treated as sub-headings in this analysis. Finally, scenario analysis evaluates the Company's performance with respect to its capability to fulfill its obligations under the future projections of a base and a stress scenario.

The qualitative analysis covers operational issues such as industry and company risks as well as administrative risks in the context of corporate governance practices. The industry analysis evaluates factors like the nature and rate of growth of the industry, its competitive structure, structural analysis of customers and creditors, and sensitivity of the sector to risks at home and abroad. The company analysis evaluates market share and efficiency, trends and volatilities in key performance indicators, cost structure, service quality, organizational stability, access to domestic and foreign funding sources, off-balance sheet liabilities, accounting practices, and parent / subsidiary company relationships if any.

Corporate governance plays an important role in our methodology. The importance of corporate governance and transparency is once again revealed in the current global financial crisis we witness. Our methodology consist of four main sections; shareholders, public disclosure and transparency, stakeholders, and board of directors. The corporate governance methodology of SAHA can be accessed at www.saharating.com.

(TR) B1	(TR) BB+ (TR) BB (TR) BB-	Carries minimum level of speculative features. Not in danger in the short term, but faces negative financial and economic conditions. If securities; below investment level, but on-time payments prevail, or under less danger than other speculative securities. However, if the issuer’s capacity to fulfill its obligations weakens, serious uncertainties may unfold.
(TR) B2	(TR) B+ (TR) B (TR) B-	Currently has the capacity to fulfill financial obligations, but highly sensitive to adverse economic and financial conditions. If securities; there is a risk in due payment. Financial protection factors can show high fluctuations depending on the conditions of the economy, the sector, and the issuer.
(TR) C	(TR) CCC+ (TR) CCC (TR) CCC-	Well below investment grade. In considerable danger of default. Fulfillment of its financial obligations depends on the positive performance of economic, sectoral and financial conditions. If securities; there are serious uncertainties about the timely payment of principal and interest.
(TR) D	(TR) D	Event of default. The company cannot meet its financial obligations or cannot pay the principal and/or interest of the relevant securities.
