

OUR ENVIRONMENTAL POLICY

As "Tat Gıda Sanayi A.Ş. ;

- During the course of our operations, we adhere to all environmental laws and obligations and develop additional practices.
- We employ an approach to environmental management based on continuous improvement.
- Aware of our impacts on climate change and energy, use of natural resources, particularly water, wastes, waste water management, and air emissions, we intend to reduce these impacts and conduct research in this area.
- We utilize energy and natural resources efficiently, notably water.
- We are actively working to reduce our air emissions, particularly our greenhouse gas emissions.
- We prevent waste generated by our operations at the source, reevaluate, recycle, and save the economy whenever possible; otherwise, we dispose of refuse in accordance with the law.
- We dispose of our refuse water in accordance with the law.
- We conduct research to preserve the extant soil structure and biodiversity in our operational areas.
- We consider the training of our employees and elevating the awareness of our stakeholders as a foundation for issues such as the significance of natural resources, biodiversity, and energy efficiency, and we conduct studies in this area.
- Technological advancements support the performance of the Environmental Management System.
- We conduct regular reviews of our environmental policy, monitor and assess our performance by adhering to set goals and objectives, and make decisions with environmental impact in mind.
- Annual reports detailing our environmental performance are distributed to our stakeholders.
- At the point of protecting natural resources and the environment, we receive the support and contributions of all our stakeholders, from our suppliers to our customers.
- We review environmental policy and practices with the sustainability committee,

environmental management units, and our stakeholders at least once a year.

- You can provide your feedback on environmental policy to cevre@tat.com.tr.
