Explanations	

In our company's material event disclosures dated April 14, 2025 and July 31, 2025, it was announced in detail that, within the scope of our sustainability strategy, the construction of the Afyonkarahisar Solar Power Plant had commenced, with the aim of obtaining the electricity needed by our factories from renewable energy sources.

The Afyonkarahisar Solar Power Plant project, located on treasury land in Çiçektepe village, Dinar district, Afyonkarahisar province, with an installed capacity of 7.3 MWe (9.9 MWp) and financed with long-term green transformation loans, is still ongoing due to operational requirements taking longer than expected and the adverse effects of winter conditions in the region. The project is planned to be completed in 2026. Significant developments regarding the process will be shared with the public in the coming period.
